

# OVERVIEW

**For DJ's on the move that need solid, dependable, 2-channel performance.**

Whether you're working with analog or digital equipment, the M101USB fits the bill perfectly as a highly adaptable two-channel mixer for virtually any DJ. The M101USB lets you get up-and-running quickly whether you're using a computer, turntables, or CDs. It is right at home at weddings, parties, clubs, and everything in-between.

## **Mix Music Your Way**

Beginners and seasoned DJs alike who want a durable USB-equipped two-channel solution will find the M101USB a perfect fit. It builds on the two-channel M101 mixer with the addition of an easy-to-use USB audio interface for DJs who want the option of working with their computer as well as traditional analog I/O.

## **Tweakable Tunes**

Beyond simply mixing, the M101USB has a built-in EQ so that you can fine-tune your mix depending on the room or the tracks themselves. Two pairs of switchable Phono/Line inputs are included along with a crossfader, 1/4" mic input and stereo RCA line output for connection to an amplifier, powered speakers, or another mixer. The M101USB can be rack mounted and features Numark's legendary industrial-grade durability.

## **Get Connected**

Connecting a M101USB to your computer is a snap using a single USB cable. Once connected you can use your computer as an audio source or record your sets straight to your computer's hard drive. If you're a computer.
