

Product description:

Numark's Red Wave Carbon gives you exactly what you need in a DJ headphone set: full-range frequency response, ear pads that deliver all-night comfort, swiveling ear cups for convenient monitoring, and a detachable cable with 1/8-inch adapter for use with virtually any gear.

The drivers are 50mm neodymium-powered units, compared to the more common 40mm headphone driver size found in most other headphones. This gives Red Wave Carbon a deep, potent bass response that really brings the music to life.

Combined with their high-temperature/high-power voice coils, the overall effect is dynamic, realistic music, reproduced with detail and accuracy.

We also paid close attention to comfort and convenience. The ear pads are a special breathable leather, which stay comfortable and cool, with no "sweating," during extended sessions. For a perfect finishing touch, we include a custom carrying pouch to store the headphones, cable and adapter.

Red Wave Carbon sounds really great, and they have the comfort and versatility that meets all the unique demands of a professional DJ.

Technical Specifications

- **Frequency Range:** 15 - 20 KHz
- **Input sensitivity:** 98 +/- 3dB
- **Cable length:** 1 meter coiled, 3 meters uncoiled
- **Weight:** 280 grams
- **Max load:** 3500 mW
- **Impedance:** 24 ohm
