DX LINK
AUDIO NETWORKING CARD

The DX Link is an Audio Networking Card for the dLive range.

The DX Link card allows 128x128 channels of 96kHz audio to be added through 4 extra DX expander link ports.

The DX ports can be utilized as 2 redundant ports or as 4 independent 32X32 ports.

Up to 5 DX Link cards can be used with a dLive system, resulting in a total of 23 DX ports (736x736 I/O)

The DX Link Card is compatible with the dLive series.

Key Features

- 2 Redundant ports or 4 independent ports

- Self-locking Ethercon connectors

- Ethernet L2 compatible

- Up to 128 inputs and outputs

Benefits

- Up to 5 cards simultaneously

- Up to 32x32 per port

- Connections can be used via a VLAN

- Supports DX auto firmware matching
