

PRODUCT OVERVIEW

Multiple Lenses for Diverse Application

Requiring 60% less distance to project images up to 350", BenQ's ultra-short-throw (UST) lens complements our 97 Series projectors to enable attention-grabbing large-scale projection in tight installations. This innovative lens makes it possible to project high-impact images in venues such as museums and galleries, retail stores and hospitality, even performance stages and events without limitations posed by ceiling height or projection distance. And because it comes from the world's #1 DLP projector brand, The UST lens is comprehensively equipped with motorized lens shift, focus, and zoom for unmatched visual flexibility.
