

## PRODUCT OVERVIEW

### DYMO D1 Labels

DYMO D1 Flexible Nylon Labels have permanent glue and are perfect for marking curved surfaces, surfaces with structure or cables. The 19mm Dymo D1 Flexible Label provides stylish, customized labels with black text on the white bottom that are fast and easy to use indoors and outdoors. D1 tape with text printed with thermal transfer technology - no ink or toner required. These durable labels are water-resistant, UV resistant and tolerate temperatures between -10 and 80° C. They attach almost all smooth and clean surfaces including plastic, paper, metal, wood, and glass. The adhesive tape is durable and hard to remove. A perfect product to label cables and uneven surfaces with.

Specially designed for bent and rough or uneven surfaces. These flexible, high-quality tapes have a permanent adhesive to keep the label on its place forever. Easy peel backing.
