AC2212/00 is a compact 2-way full-range loudspeaker system comprised of one 300 mm (12 in) low frequency driver and one 38 mm (1.5 in) exit/44 mm (1.75 in) voice-coil compression driver. The PT Progressive Transition waveguide provides wide 100° by 100° coverage. High-slope passive crossovers minimize band overlap.

The cabinet is fitted with M10 threaded suspension points. Optional U-bracket, as well as pre-engineered array bracketry is available for easy installation. Four threaded inserts located on back of the enclosure allow attachment of an Omnimount™ or similar mounting bracket.

AC2212/00 is part of JBL's AE Application Engineered Series, a versatile family of loudspeakers for a wide variety of fixed installation applications.
