AC2215/64 is a compact 2-way full-range loudspeaker system comprised of one 380 mm (15 in) low frequency driver and one 38 mm (1.5 in) exit/25 mm (1 in) voice-coil compression driver. The PT Progressive Transition waveguide provides 60° by 40° coverage. High-slope passive crossovers minimize band overlap and well-controlled off-axis response enhances arrayability.

The cabinet is fitted with M10 threaded suspension points. Optional U-bracket is available for easy installation.

AC2215/64 is part of JBL's AE Application Engineered Series, a versatile family of loudspeakers for a wide variety of fixed installation applications.
