ACCESSORIES

Cup Holder

thanks to it a few cups can be available at any time.

Cappuccinatore (Milk foamer) perfect to make an excellent cappuccino, even for who is far away from being a good barista.

Cappuccinatore-cleaner (Milk foamer cleaner)

easy system to keep the milk foamer always clean after use.

Pannarello

is a practical tool to be pushed on the steam arm to get a perfect cappuccino.

Volumetric Flow metre

programmable and enable to automatically adjust the coffee quantity according to need for short coffee and hot water.

Spinel Credit Coffee System

helps monitoring and control the amount of coffees that the machine brews: the machine stops working when it reaches the number of coffees preset by the operator.

Pulse-counter

this device allows an immediate check the number of espresso coffees that the machine has brewed using a small 5 digit analog counter.

Step

this backslash step over the classic cup of Italian espresso coffee or the large cup (medium) longer coffee.
