

Epson C12C891131 Overview

*This **Adobe Postscript 3 Hardware Module** from **Epson** is designed for SureColor T-series printers and provides users with the ability to upgrade their printer with Hot-Folder batch printing and secure PDF printing. A 320GB internal print server is also included that adds print job queue management along with job save and reprint capabilities. This will allow for faster workflows and increased productivity by moving jobs from computers to the printer.*
