

PRODUCT OVERVIEW

The pack of ten white **W81 Microlite Windscreens** from **AKG** is designed for use with the LC81 MD (lavalier), EC81 MD (ear-hook), and HC81 MD (headworn) reference lightweight cardioid microphones. You simply place this foam windscreen over the microphone's wire-mesh cap for additional sound protection in challenging environments.

If your performance requires even more protection from the elements (e.g. in a windy outdoor venue), you can simply place an additional foam windscreen W81 above the the cardioid wire-mesh protection cap (WM81). It increases the size of the microphone by only a fraction, and produces clean sound in challenging environments.

Features

- LC81 MD reference lightweight cardioid lavalier microphone
- EC81 MD reference lightweight cardioid ear-hook microphone
- HC81 MD reference lightweight cardioid headworn microphone
