

# AKG 6000 H 60010 Overview

Use AKG's **SA 60 Stand Adapter for Straight Shaft Mics** to hold small or medium condensers and straight-bodied dynamics firmly on your stand. Adjustable angle lets you orient the mic toward your source.

The SA 60's screw thread fits standard 5/8" (1.6 cm) microphone stands.

## Stabilize Your Microphone

The Mic Stand Adapter holds on to your mic, freeing your hands and providing stability. Clean your performances of handling noise and maintain a consistent mic position on the stage and in the studio.

## Mount with Confidence

Rubbery plastic grip hugs your mic tightly without scratching it. Pliant material also makes it easier to mount and remove mics without a lot of friction noise.

## Fits Most Common Straight Shaft Mics

The SA 60 is compatible with most narrow-bodied condenser microphones as well as many dynamic mics.
