

The DMSTetrad Performer Set (EU) is a professional digital 2.4GHz wireless system for license free operation with a 10mW RF power rating conforming to European regulations. The set includes the DSRTetrad digital wireless receiver and two DPTTetrad bodypack transmitters. The system provides uncompressed studio quality and in addition to the pocket transmitter the system is shipped with two C111 LP ear hook microphones and two MKG L instrument cables. The receiver offers four channels in one rugged 19" housing. Its one-click pairing function gets the system up and running in seconds.
