

The highly anticipated recreation of the benchmark in LAN gamer cases, Scout 2 offers refinements on its predecessor's design to arrive at a theme steeped in the future of combat. These refinements are bolstered by improved steel reinforced carrying handles, bolted to the core structure. Front console connections have been updated to USB 3.0 while offering protection from adverse travel conditions with hidden sliding cover. Support for current high-end hardware is greatly increased by a removable HDD cage that supports VGAs like the NVIDIA GTX 690 and AMD HD 7990, making the Scout 2 better prepared for all conditions.

Features

- Ergonomic steel reinforced carrying handles bolted to support beams of the core structure
- Dual USB 3.0 support for 10x faster file transfer and high current smart phone / tablet charging (~1A)
- Supports up to 3 ODDs (tool-less), 7 HDDs and 2 SSDs for increased expandability
- Supports up to 9 fans, including dual 120mm fans on the acrylic side panel window
- Top panel LED switch to disable the LEDs of two separate LED lit case fans at night
- Supports all high-end graphics cards after removing the 1st HDD cage
- Dust filters for PSU (slide out) and top panel
