

The LX range is more than just a practice amp, with its depth of tone and aggressive snarl you can really take your playing to the extremes! Simple and easy to use with a logically laid out front panel, you have the power to build a fantastic sonic landscape in a simple easy to use fashion. With loads of character and charm, the LX range comes fitted with rugged metal grills, great for travelling on the road and highly durable. You will soon find your LX is the ultimate, essential companion!

Here's what Laney say about the Laney LX120RT LX Guitar Combo 120 watts

PACK A MEAN PUNCH

The LX120RT packs a mean punch when it comes to gig worthy combos. It's twin channel pre-amp covers all the bases from a tone point of view and it's 2 x 12" HH drivers handle everything the 120 watts RMS output section throws at it whilst still remaining portable and easy to lug round in the boot of your car or back of the van.

TWIN CHANNELS

The LX120RT's twin channels, give you everything from clean to extreme and with 3 band EQ per channel you've got powerful control over your tone, and for that Extreme Tone Shaping option the LX120RT features an XTS option that really kicks things about!

Finished off with a high quality onboard reverb, an FX Loop and a CD input you've got everything you need to take you playing to the next level and beyond.
