

Features

DriveCore™

- Crown's DriveCore technology includes five patents, providing best-in-class versatility and durability

Innovative Technology.

- The next generation of PWM technology using cutting edge Class D amplifier topologies
- Audio Video Bridging (AVB) Ethernet transport ports
- Revolutionary cooling system; focuses airflow on parts that need it most for maximum efficiency

Software

- Compatible with HiQNet Audio Architect™ software
- TCP/IP based protocol in HiQnet for network monitoring and control

Power

- Direct drive 'constant voltage' capabilities on channel by channel basis at 70Vrms and 100Vrms
- Minimum Guaranteed Power Ratings
- Advanced PFC universal power supply; universal AC input accepts 100 – 240VAC, 50/60Hz (±10%)

Network & Control

- Continuous load monitoring
- Comprehensive error reporting
- Pilot tone monitoring
- Programmable general purpose input/output (GPIO) ports

Digital Signal Processing (DSP)

- LevelMAX™ limiters for inputs and outputs with thermal limiting
- Input and output delay
- Input and output EQ
- Signal generator
- Crossover
