

Alesis ASP-1

Your favorite keyboard, now with more sustain

The Alesis ASP-1 is a universal sustain pedal with a polarity switch that expands the expressive control of any electronic keyboard. This low-profile, momentary pedal is built to perform and comes in a compact, simple design that's suited for the stage or studio. The fast-acting sustain mechanism provides an immediate response, and the ASP-1 comes ready with an attached 1/4" plug for out-of-the-box use. A non-slip bottom secures the pedal in place.

FEATURES

- Low-profile, momentary sustain pedal expands expressive keyboard control
- Polarity switch provides universal compatibility for use with any keyboard
- Non-slip bottom and footpad keeps the pedal secured in place
- Fast-acting, durable mechanism for immediate response
- 6-foot attached cable with 1/4-inch plug for out-of-the-box use
