

Overview

Targus 4k Universal Docking Station creates a superior screen experience for the workspace. Power users streaming video or high resolution graphics can connect laptops, tablets and smartphones to the dock via a simple USB connection and achieve maximum screen resolution to 4k. Extend device connectivity by 6 USB ports and add an Ethernet port. This universal USB Docking Station ensures current and future hardware fleet compatibility.

Supports 4K Maximum Resolution & Multi-Screening

Power users streaming video or high resolution graphics can connect a 4K monitor using the DP port for incredibly crisp, clear images at resolutions up to 3840 x 2160 x 30fps. Also supporting dual monitor set up at resolutions up to 2048 x 1152 x 60fps

Innovative Design

A compact, sleek industrial design make this dock a sure fit for shrinking desktops and tight spaces with elements like stacked ports. The raised grooves on the non-slip, angled top create a comfortable typing position for a laptop while offering passive cooling.

USB 3.0 for Advanced Peripherals and Charging

Six USB 3.0 SuperSpeed ports make it simple to add the latest keyboards, exterior hard drives, and other peripherals to customise the workspace experience. The dock also includes a powered USB 3.0 port for charging your smartphone.

Multi-Platform Compatibility

Unlike proprietary docking solutions which lock users in to a specific device and brand, the 4K Universal Docking Station works with multiple platforms and operating systems, eliminating the need to replace it at the next device refresh.
