

Overview

The 15.6" Corporate Traveller Backpack is made for the road. Features a hidden trolley strap which attaches to your rolling luggage for effortless travel.

It's easy to access your gear and gadgets with a zip-down workstation that organises your pens and styli, business cards and supplies. The soft-lined front pocket keeps your small items secure, and there's a dedicated file compartment with divider and mesh pockets for power storage. Two water bottle holders keep your coffee or water at arm's length.

Made with durable material and a state-of-the-art SafePort® x D3O® protection system to help prevent drop and side-impact damage, you can rest assured your devices are protected. Its water-resistant bottom delivers stability and standability. It's also comfortable to carry, with a moulded air mesh back panel and ergonomic shoulder straps that flex to take the brunt of the weight, instead of your shoulders.

Sturdy and Secure

Our patent-protected SafePort® Air Cushion System is a single chamber that combines vented air cushioning and high-density foam padding. These specially engineered adjustable polyurethane pillows "float" the laptop inside the case, providing superior side and vertical impact protection. Made from a sleek, lightweight material that is water- and wear-resistant to safeguard your supplies from the elements.

Intuitive Organisation

With a tablet compartment, removable accessory pouch, and zippered side pocket, the Corporate Traveller Backpack is incredibly organised so that finding your pens, phone and more is quick and easy. File dividers organise your documents and keep them looking fresh. A mesh side pocket on the side puts your water bottle or coffee cup at arm's length.

Contoured Comfort

The 15.6" Corporate Traveller Backpack is made for creature comfort. It has carefully designed air mesh padding over the entire pack, including on the thick panels that contribute to air flow that help keep you cool. But where it comes into contact with you under a load is where we paid special attention. The contoured straps are lined and padded and were made to flex and bear the brunt of your gear's weight. Adjustable sternum strap gives you extra support.
