

Description

The USB-C DisplayPort™ Alt-Mode Travel Dock is an ultra-portable tool for serious mobile professionals and road warrior presenters. It's built to connect to the equipment you'll find on the road, like projectors and TVs. It leverages DisplayPort™ Alt-Mode (compatible with Thunderbolt 3) native video so it'll connect with compatible USB Type-C DisplayPort™ Alternate Mode and Thunderbolt™ 3 hosts, and it supports up to 4K2K resolution. If you're a mobile presenter, you're never quite sure what equipment you'll encounter when you walk into a remote site, classroom, or conference room. Even if you stuff your laptop case with adapters, you may arrive to find you've missed a key adapter. Focus on your presentation, not your technology by adding this lightweight, versatile USB-powered dock to your mobile gear.
