Washburn designed the Festival series to address the needs of the performing musician and it has succeeded for over 25 years. The Festival series was the first hard acoustic/electric guitar seen on MTV's "Unplugged" series and has since become one of the best selling and most copied guitars on the market. A comfortable body teamed up with quality Barcus-Berry electronics, hardware, and fine woods allows the pristine, crystalline highs to blend perfectly with a full, well rounded low end.

FESTIVAL EA15

KEY WASHBURN FEATURES

COMFORTABLE MINI JUMBO CUTAWAY BODY

The EA15's mini jumbo body is easier to play for those that find the larger dreadnought & grand auditorium shapes uncomfortable. The EA15 MJ is suited for smaller players, young learners, or musicians looking for the more focused and intimate voice that a small bodied guitar provides. Built with a cutaway so that access to the upper frets is a breeze.

FESTIVAL EA15

Plug-in ready and pre-equipped with a pre-amp and pickup loaded with features such as an onboard tuner controls and feedback resistance, all from Barcus Berry the developer of the first ever piezo crystal transducer musical instruments in 1963.

TOBACCO BURST GLOSS FINISH

A Tobacco Burst gloss finish is applied to this Festival EA15 to create an instant classic. The coffee colored fade from dark to light really brings out the character of the wood in its figured Maple top.

SPECIFICATIONS

FESTIVAL EA15
