[SEE SPECS](#)

The F11SCE is a folk style acoustic guitar that's perfect for singer/song writers and those who love the added articulation that a folk sized body brings to the tonal table. The cutaway makes it possible to reach the highest frets and the included Fishman electronics let you sound your best when amplified. It features a solid cedar top and Cathedral Peak Scalloped-X bracing for superior tone that improves with age, mahogany back, sides and neck, an Ovangkol fingerboard and bridge, die-cast tuners for quick, easy and accurate tuning, a Washburn tortoise pick guard and a Washburn Heritage rosette.

The F11SCE is well suited to finger picking and those who prefer a smaller bodied acoustic. It's a great performing or recording instrument. With its built in premium Fishman Presys II 301T Tuner/Preamp, you'll never have to carry a tuner with you, plus it provides the most natural amplified acoustic tone and features volume, bass and treble controls and a phase switch for feedback control.

BODY & CONSTRUCTION

Top Wood	Solid Western Red Cedar
Back Wood	Mahogany
Sides	Mahogany
