

Targus's ideal travel companion bag has a certain Dome Protection System, offering shock-absorbing layers to disperse pressure and protect your laptop and other devices from shoves and crushes. The zip-zappy mesh pocket up-front lets you quick-access whilst freeing up space for notebook and stationery too. Fit-in a laptop and an additional tablet too, with minimal leeway for storing essentials. The trolley strap makes it virtually a strolley, an ideal bag for those who commute frequently.
