

# Vertiv MP2-210K Specifications

## MicroPOD 230V 10A

### Overview

When your computer system can't be without power - even for maintenance - a Liebert MicroPOD ensures continuous uptime. The MicroPOD provides maintenance bypass capability as well as power output distribution, and can be used with virtually any micro-UPS system.

The MicroPOD allows you to manually transfer your connected equipment to utility power via a maintenance bypass switch, permitting scheduled maintenance or UPS replacement without power disruption. Transferring back to UPS power is just as easy - just turn the switch to the indicated position and your load is protected by the UPS.

Available in plug and play or hard wired options at 120V or 208V rating. Includes brackets for rack mounting in any direction.
