

ESP EIIIECBMBLUNFD E-II Eclipse Electric Guitar in Blue Natural Fade with Case

From ESP:

As one of the best-looking, best-sounding, and highest quality single cutaway guitars ever made, the E-II Eclipse is made in Japan at the ESP factory, and designed for serious players who rely on their guitars for professional-caliber stage and studio work. This guitar offers a collection of top-tier components, like a bone nut, Schaller Straplocks, Gotoh locking tuners, and a Gotoh TOM bridge and tailpiece. Perhaps most impressive is its set of EMG 57TW/66TW set for coil splitting each active pickup with individual push-pull controls on both volume knobs.

Built with set-thru construction on a mahogany body and mahogany neck, the latest version of the E-II Eclipse is available in three styles: a Buckeye burl maple top in Blue Natural Fade finish; a flamed maple top in Black Natural Burst; and a maple-capped Snow White Satin finish.

All E-II Eclipse models offer high-end design features like multi-binding on the body, neck, and matching headstock, and include an ESP hardshell case.

If you have any questions about this ESP E-II Eclipse in Blue Natural Fade, give us a call today.

Available at Ken Stanton Music.

UPC: 799493265101

Model: EIIIECBMBLUNFD
