

PRODUCT OVERVIEW

Avocent USBIAC2-10 is a 10ft USB CAT 5 integrated KVM access cable designed to reduce cable bulk. Use the USBIAC2-10 cable to convert keyboard, monitor and mouse signals from a server through a single integrated CAT 5 cable to your switch. The USBIAC2-10 cable draws its power from the server and has Keep Alive functionality that will keep your server working properly with or without connectivity to the Avocent KVM switch or serial console switch.

The USBIAC2-10 supports USB 2 peripheral devices (Virtual media & Smart card/CAC) on Avocent Mergepoint KVM switches.
