

Designed to work with the following amps: ID:15TVP, ID:30TVP, ID:60TVP, ID:60TVP-H, ID:260TVP and ID:100TVP

The FS-10 is a multi-function footcontroller that allows access to all 128 patches plus the tuner function. It operates in three modes:

Patch Mode – This mode allows you to switch between the three banks of four patches accessible on the front panel of the amp (patches 1-12) in addition to patches 13-128, plus access to the tuner function and the ability to change to the other modes.
