

PRODUCT OVERVIEW

Cutting multiple sheets of paper is easy work for a Dahle rolling trimmer or guillotine, but when you need to cut an entire stack, there's no better tool than a Dahle Stack Cutter. These industrial workhorses will give you the precision you need along with the safety you deserve. Each cutter has built in features that will increase the efficiency of your tasks as well as provide a safe and pleasurable cutting experience.

Dahle Professional Stack Cutters are manually operated but make easy cutting of up to 700 sheets of paper at a time. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up position. Once the shields are in place, you have the ability to cut cleanly through 200, 500, or 700 sheets of paper with very little effort. This clean, burr free cut through such a large stack of paper is made possible through a ground Solingen Steel blade and a paper clamp that places even pressure across the entire cutting surface.

Model 842 offers an adjustable paper guide and models 846 and 848 feature a spindle driven, self-locking backstop for extreme accuracy and convenience during repetitive cuts. These cutters can be mounted on any secure table surface although the optional floor stands are recommended for proper cutting height and leverage. Dahle Stack Cutters are manufactured in Germany and can be found in art departments, custom frame shops, and print & copy centers throughout the world.

Features

- A3 size Heavy Duty Cutter
- Cutting length: 430mm
- Cutting capacity: 150 sheets (80gsm)
- Minimum cut : 30 sheets

- Weight: 30.4 kg
- Ground upper blade
- Safety cover designed so that each side can be raised individually
- Quick action clamping
- Scale bar marked out in cm, inch and DIN sizes
- Manually adjustable back-stop
- Back-stop side 430 x 430
- Off-cut side 430 x 215 mm
- Two Years Warranty, excluding wear parts!
- Made in Germany
