  - Rubber Hanger = No Need for Extra Straps
- 

## ITEM DETAILS

The Pearl C1030SC Gooseneck Suspended Cymbal Stand hangs your concert cymbals with a minimum of dampening, allowing the instrument to speak as fully as it possibly can. The neck reaches out far enough to accommodate the largest suspended cymbals out there.

The rubber cymbal hanger eliminates the need for you to carry around extra cymbal straps - just put the hanger through your suspended cymbal and you're done!

Two tiers of height adjustment make sure you can play the cymbal at a comfortable height, and ergonomic wingnuts won't hurt your hands when tightening or loosening.
