High-end cymbal holder with innovative curved design

The **Pearl CH-1030C cymbal holder** features the unique curved design and extended **positioning range**. With the **Pearl Gyro-Lock function**, the angle can be adjusted smoothly and stably. The exclusive 12.5mm curved arm provides a unique setup function and a modern visual appearance. The bottom of the boom is a **percussion rod** and interacts with other Pearl percussion and accessory parts.

The **WingLoc quick release** provides quick and easy cymbal changes and **7/8" base** fits most multi clamps and holders.
