

Description:

- High-quality USB digital audio output
- The multiple functions of the remote control
- Smooth HD voice call
- Microphone noise reduction, adjustable rotation
- Share music with friends
- Support microphone volume control

Key Features:

1. **Experience clear internet calls** with simple plug-and-play USB connection and a noise reduction, adjustable rotation. The multiple functions of the remote can let you control volume or mute without interrupting calls. Enhanced High-quality audio with your favorite music and games.
2. **Perfect business headset for voice calls**, Skype, webinars and more. The cable is just the right length to give you the freedom to stand up and stretch during long conversations.
3. **Rapoo H120 plug-and-play headset** can be used with any PC or Mac computer with a USB port or adapter without the need to install the software.
4. **Minimizes unwanted background noise** for clear conversations. The rigid, left-sided mic can be positioned for better voice capture. A movable boom can be tucked out of the way when you're not using it.
5. **Multiple functions of the remote control** on the headset cord let you adjust the volume without disruption.
