

Description

Rapoo VS500 Dual Point Omni Directional RGB Gaming Microphone

The Rapoo VS500 Omni Directional RGB Gaming Microphone heart-shaped receiver catches the sound source in front, eliminates unnecessary noise from the side or rear of the outside world, and can better pick up the sound source.

Cool RGB lights

The Rapoo VS500 Omni Directional RGB Gaming Microphone has Cool RGB lighting that shines brilliantly like stars in the night. You may experiment with eight different lighting options. Spectrum cycle mode (the default), mode-red light, mode-blue light, mode-light-off Switch illumination modes using the 3S multi-touch key.

Axis design can rotate 360°

The Rapoo VS500 Omni Directional RGB Gaming Microphone features a 360° rotatable design. The coupling between the microphone and the tripod is designed with a universal shaft construction that can be turned 360° to satisfy the demands of utilizing sound from various perspectives. The 1.8m detachable storage cable body is connected to the body via the USB-C interface, which can be simply and conveniently plugged and removed (Plug and Play). The tripod's bottom is fitted with three non-slip feet that limit vibrations and movements of the microphone generated by the user, especially in intense conditions like those seen in The tough games. The gadget may lessen the intensity of the sound unreasonably.

Easy connection, no need to use software

The Rapoo VS500 Omni Directional RGB Gaming Microphone is Detachable 1.8m cable, USB Type-C connection between devices, may be released by simply connecting and unplugging, easy and fast without the need to install card software sound (driver).

Cool Sombra Metetal Body

The Rapoo VS500 Omni Directional RGB Gaming Microphone is a one-of-a-kind form of an extraterrestrial spaceship shuttled among the stars and poised to take off. The all-metal shell design offers a remarkable texture, generating sparks in the clash of technology and music.
