

PRODUCT OVERVIEW

The Rapoo V280: A Budget Gaming Mouse with Some Neat Features

Performance-oriented gaming peripherals do not come cheap. The top-rated gaming mice offer serious gamers the performance boost they need in competitive arenas. For the casual or average gamer though, they might be overkill, especially when they are on a budget. But regular mice are far too dull and do not look good with a gaming rig. The Rapoo VPro V280 gaming mouse looks like it is made for gamers on a budget. Let's check it out in this short but in-depth review

Ergonomic design to suit for right hands. Special coating material, improve slip resistance. Side rubber, enhance grip and slip resistance. Onboard memory, save and play. LED Multi-color light system with 16 million colors around mouse.

- Part Number: 16992
- 60 MHz V-Power3 Gaming Chip is the 32-bit control center of the mouse. It processes your commands at breakneck speed, giving you complete control over the gameplay
- The ergonomic shape ensures your hand remains relaxed while pulling all-night epic gaming sessions
- Moreover, the V280's on-board memory lets you save your custom configurations directly on the mouse
- DPI Shifting key for better control
- Colorful backlight with adjustable speed
