

All the tones you need in style will cover by the SE 245 and the answer for players who grew up using short scale, single-cutaway guitars. The 245 "S" treble and bass humbuckers with dual volume and dual tone controls give the SE 245 a classic voice that is eminently recordable and gig ready. Also, the 24.5" scale length, wide fat neck is instantly comfortable. Bird inlays and the PRS SE signature logo design come standard.
