

Product Description

The 245 Singlecut model is a cornerstone of the PRS catalogue. This affordable SE version encompasses all of its US counterparts key features, but is available at a far more affordable price. With timeless styling and reliable hardware, the PRS SE 245 is a versatile instrument made for the studio and the stage.

Following a tried and trusted formula, the PRS SE 245 features an all-Mahogany construction, powerful dual humbuckers and a comfortable neck for inspiring playability.

Body & Neck

PRS' SE 245 boasts a Mahogany body, delivering a warm sound with plenty of harmonic richness in the mid-range. With bevels around the entirety of its singlecut shape, the SE 245 also has a cozy feel that allows you to play without hindrance.

Joining the SE 245's body is a Mahogany neck carved to PRS' acclaimed "Wide Fat" profile. Although it may feel quite substantial to modern players, this neck shape is designed to offer optimal support for tricky chords and intricate arpeggios, while the silky smooth Rosewood fingerboard offers a luxurious touch under the fingers.

Hardware & Electronics

The PRS SE 245 is fitted with high-quality hardware that'll simply never let you down when playing onstage or recording in the studio. Equipped with PRS' Adjustable Stoptail bridge, this beautifully-machined piece of hardware combines traditional design with the perks of modern tweakability. At the other end of the instrument you'll find a set of PRS-designed machine heads; keeping your tuning super-solid.

This outstanding instrument gets most of its voice from its set of 245 "S" pickups, which deliver classic PAF-style sounds. Crystal-clear with clean amp settings, these pickups also cope well with thick doses of overdrive and distortion, making them apt for most genres.
