# Desktop Note Sorters

The Currency Tech range of desktop note sorters have been specifically designed to meet all your processing requirements; whether you are a Bank branch, Casino, Cash Centre or just simply wish to sort mixed notes fast and efficiently.

The new range of note sorters allows continuous and uninterrupted counting by placing all off sorted notes into a second pocket increasing both productivity and efficiency.

Both machines are ECB approved and pass the Bank of England framework test. They offer a wide range of flexibility including multiple fitness functions, automatic batch settings and high level counterfeit detection.

Features:

- Multiple sorting modes**  
 Both the X7 and K2 have a choice of sorting modes include Denomination, ATM fit\*, Fitness\*, Face, Orientation and Issue.
- High productivity**  
 The X7 and K2 process banknotes up to a speed of 1000 n/m in Count, Value and Sort mode. The capacity of the additional pocket on the X7 is 100 notes and on the K2 is 250 notes.
- Multi Currency select function**  
 Over 15 currencies to choose from and with the availability to store up to 5 currencies in the memory at any one time. This includes the identification and sorting of all Scottish notes from the current issuing banks along with high level authentication making the K series the most versatile machines on the market.
- Bank of England framework test**  
 Both the X7 and K2 have been tested by the Bank of England with the latest known counterfeit types and all were identified as counterfeit by the machine.
- Proven detection**  
 Both are equipped with the newly developed IR/MG/UV and tape sensor. A full width CIS sensor is used across the range.
- Fitness detection**  
 The K2 complies with ECB standards of the Banknote Recycling Framework. Its Fitness Detection Functions determine taped, soiled, dog-eared, poor-quality and worn notes from good quality notes.
- Ergonomically designed**  
 The compact design of the unit allows for easy and simple to use operations. The large LCD screen enables the operator to verify each operation and observe detailed information at the touch of a button.
- Easy maintenance**  
 The X7 and K2 are equipped with a self-cleaning sensor function that requires minimal maintenance.
- After sales service**  
 Currency Tech Ltd has nationwide coverage of technical engineers.

## X7

The X7 is a compact desktop note sorter, ideal for bank branch, cash centres and currency exchange offices. The X7 offers high throughput by continuous and uninterrupted use.

Features include:

- Auto batch function
- Multiple sorting modes
- Facility to connect to cash management systems

## K2

The K2 is a desktop two pocket note sorter, targeted for bank branch and cash centre applications, with the ability to offer a cost effective solution for fitness and denomination sorting. The K2 offers high throughput by continuous and uninterrupted use.

Features include:

- Auto batch function
- Multiple sorting modes
- Sorts to ATM fit standards
- Facility to connect to cash management systems
