

The PRS S2 series: custom-shop quality made affordable

In their never-ending quest for guitar perfection, PRS has created the S2 series of guitars. These guitars were designed to give you all the tone and playability that the PRS Maryland factory is known for in an affordable, beautiful instrument. Key features of this series include custom-wound pickups, PRS-designed bridges and tuners, and a hybrid gloss finish. The PRS S2 Custom 24-08 delivers amazing playability and massive tone at a killer price.

85/15 "S" pickups offer remarkable clarity and extended tonal range

Playing your favorite licks through the S2 Custom 24-08's 85/15 "S" pickups is a wonderful experience. That's because 85/15 "S" pickups are modeled after the 85/15 pickups Paul Reed Smith designed for PRS's 30th Anniversary. From shimmering cleans to blistering high-gain tones, the clarity and extended tonal range provided by these pickups make the S2 Custom 24-08 the ideal workhorse guitar. Two independent coil-splitting mini toggles further fortify your sonic

arsenal with a range of spanky single-coil tones, taking the total number of pickup combinations to eight. At Sweetwater, we love the sweetened, vintage-inspired sound of 85/15 "S" humbuckers.

Pattern Thin neck profile for fluid playability

The S2 Custom 24-08 features PRS's Pattern Thin neck profile. Evolved from designs Paul Reed Smith has been working on for decades and perfected after years of prototyping, the Pattern Thin neck carve is an updated version of the traditional Wide Thin neck style. The Pattern Thin neck shape is fast and comfortable — ideal for players with smaller hands or guitarists who use classical left-hand positioning, pivoting with their thumb on the back of the neck.
