

Description

The PRS Custom 24 is the iconic PRS guitar that every guitar player wants to get hold of; if only the price was not so prohibitive. PRS released the SE Custom 24 to bring this quintessential PRS guitar to the hands of more and more players of all levels.

The SE Custom 24 features that distinctive double-cutaway body shape, with a Mahogany back and gorgeous Maple top for a balanced tone. The 24-fret set-in Maple neck with Wide Thin profile would feel good for anyone; whether you are a super shredder, a traditional blues player, or a beginner learning the first few chords and scales. The 25" scale length is also what gives this guitar its unmistakable PRS feel and sound. The dual 85/15 "S" humbucker pickups can handle clean and overdriven tones well. For even more versatility, you can pull up the Tone control to put the humbuckers in single-coil mode; perfect for funky rhythms, country twang, and bluesy solos! The smooth and stable PRS Tremolo System lets you play with more expression.

Get premium PRS sound and feel without the premium price with the PRS SE Custom 24 Guitar!
