

## PRS SE 20 Tube Combo Amplifier at a Glance:

All-tube design

Custom speaker

Easy cabinet matching

### All-tube design:

The PRS SE 20 tube combo amp packs 12AX7, 12AT7, and "JJ" 6V6 tubes to cover some serious tonal territory. While clean tones come through thick and vibrant, there is plenty of gain available for incredibly overdriven rock and metal tones too.

### Custom speaker:

The SE 20 tube combo from PRS features a custom-voiced speaker designed by PRS and Eminence. This 12" speaker holds firm at low gain settings, but breaks up nicely when pushed hard.

### Easy cabinet matching:

Need to push more air? The PRS SE 20 tube combo amp makes it easy to add an extension cabinet. It has dual speaker outputs and a 4-, 8-, or 16-ohm selector switch to pair the SE 20 with virtually any speaker cabinet.

## PRS SE 20 Tube Combo Amplifier Features:

Highly expressive and responsive all-tube combo amp, with boutique features at a surprisingly low price

Two channel design, with dedicated tone controls for each channel

Global reverb

Effects loop with Line/Inst switch lets you hook up virtually any sound source or processor

Dual speaker outputs can be used with virtually any extension cabinet to expand your rig

Closed-back design for a tighter, focused sound
