

The PRS SE Mark Holcomb SVN is an affordable way to nail the prog-metal tones of Holcomb's Periphery. This highly specialized 7-string boasts features that help Holcomb excel at his technical playing style, such as a proprietary fixed PRS bridge and a 20-inch fingerboard radius; together, these endow the SE SVN with unflappable tuning and effortless playability. The ebony-capped, 26.5-inch-scale Wide Thin maple set neck adds punch and clarity to those dropped-A riffs. And with 24 frets on the board, the SE Mark Holcomb SVN makes it easy to nail those wide octave runs and sweeps. The SE SVN proudly sports Paul Reed Smith's script headstock and Birds inlays, adding extra "cool" to PRS players in the know. And for outrageous tone, the PRS SE Mark Holcomb SVN come outfitted with a pair of Mark's signature Seymour Duncan pickups to give you clarity and definition, even in high-gain situations.

---

### Specialized for the needs of Mark Holcomb

Periphery have helped set the bar for modern progressive metal, and Mark Holcomb is a lot of the reason why. His style combines exotic note runs, intense jack-hammer riffing, and fluty single-note melodies, all of which requires a high specialized instrument. While Mark's Maryland-made Limited Edition signature model has been a huge hit for PRS, this SE SVN makes his signature instrument attainable for a much wider audience. We're huge fans of Mark's playing and have enjoyed having him here at Sweetwater on several occasions.

## Clean, muscular tones

The engine that make the SE Mark Holcomb SVN run are its Mark Holcomb signature Alpha and Omega Seymour Duncan passive humbucking pickups. Each pickup was designed to achieve a very specific result. The Omega bridge pickup is focused and aggressive in the mids and lows for plenty of punch, while retaining enough highs to ensure high-gain note clarity. The Alpha neck pickup combines the fat and glassy sounds of other neck humbuckers with plenty of pick attack and clear fretting-hand phrasing. And a push-pull tone knob adds single-coil type tones to the guitar's voice.

---

## Fast response

Every aspect of the SE Mark Holcomb SVN has been crafted to allow an unrestricted playing experience. The maple neck is capped with a beautiful piece of ebony that feels sleek under the fingers, while its 20-inch fretboard radius aids in wide bends and nimble string-to-string playing. The neck also boasts PRS's famed Wide Thin neck carve that is full enough to remain comfortable, but thin enough for you to fly up and down the frets.

## Made beautiful, inside and out

The SE Mark Holcomb SVN's rich-yet-balanced sound is a result of its timeless tonewoods

---

combination: mahogany capped with a solid maple top, here with a stunning walnut veneer. The mahogany body gives you natural tonal warmth, which is offset perfectly by the brighter tone of its maple top. Together, these tonewoods give you an incredibly balanced sound. The set maple neck and 24-fret ebony fretboard offer smooth playability and a full two-octave range on every string.
