

Technical Parameters

Notice: The parameters below are only for your reference.

Printing Technology	FDM
Product Dimensions	510*494*670 mm
Machine Structure	Fully enclosed, Four-door opening design
Printing Size	310mm*310mm*350mm
Printing Precision	0.1-0.2mm
Printing Speed	20-180mm/s
Input File Format	STL, OBJ
Printing Filaments	PLA /ABS
Number of Nozzle	Single nozzle
Nozzle Diameter	0.4mm
Connectivity	TF Card
Slicing Software	Wiiibox slicing software
Build Platform	Removable micro-flexible platform
Display Screen	7" color touch screen
Platform Levelling	Proximity switch magnetic induction automatic leveling
Filament Alarming Function	Yes
Resume Functions	Save before resume printing
Air Filter Function	Yes, three-layer air filter module
Language	Support 7 languages switching
Operation Way	Support 7 languages switching
Other Functions	Error diagnosis; Boot intelligent self-test; Firmware online upgrade; Visual wizard
