Roger big

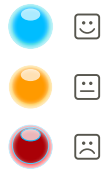
Air purifier

WiFi

ROGER – sensitively achieves cleaner air

Dual Filter™ combines HEPA- and activated carbon filter

Integrated air quality indicator with changing color



5 output levels, auto mode, timer and night mode

Equipped with WiFi: device control via app

ROGER BIG ROOM SIZES UP TO
62 m² with 5x/h air exchange*
104 m² with 3x/h air exchange**

*(heavy air pollution acc. to AHAM)
**(moderate air pollution & normal use)

Sanitized Protection

Independently tested by airmid healthgroup
airmidhealthgroup.com

Roger big provides clean air in large spaces and continuously measures the quality of the air. If the air quality deteriorates, the air quality indicator lets you know by changing colour. If the intelligent auto mode is also activated, Roger big's cleaning performance will be adjusted automatically. The well-designed air purifier also has two washable, textile pre-filters – with integrated Sanitized® hygiene function. At the heart of the air purifier are two Dual Filters™ which are a combination of a H12 HEPA filter and an activated carbon filter. The highly efficient HEPA filter removes pollutants such as fine dust, allergens, pollen, viruses and bacteria while the activated carbon filter adsorbs gases from the air. Roger big removes 99.9%* of all coronaviruses (SARS-CoV-2) from the air in an hour. Besides transport castors which enable him to be moved around, Roger big's impressive features also include WiFi: you can monitor the air quality and control all his functions via an app.

Black

Specifications

Power: 4–90 W
CADR up to: 736 m³
Air quality indicator / textile Pre-filter & Dual Filter™
Device control via app / Auto mode
LED dimmer / 1–7 h timer / 5 output levels
Filter timer & exchange reminder
Dimensions: 420 x 520 x 340 mm L x H x T)
Weight: 10.5 kg
Sound level: 28 – 58 dB(A)

Accessories:
Dual Filter™ , Textile Pre-filter
