XFX AMD

P1-550S-XXB9

The XFX TS Series 550W is an 80 Plus Bronze certified PSU that combines great performance, innovative design, and the high quality required by hardcore gamers and DIY enthusiasts. Advanced EasyRail technology allows you to run power-hungry components, such as a CPU and GPU, without worrying about individual rail limits. The hybrid fan delivers effective cooling noiselessly. Enjoy first-class reliability and stability with 105C Japanese capacitors.

KEY FEATURES

- 80Plus Bronze Certified
- Crossfire and SLI Ready
- Haswell Ready
- EasyRail Plus Technology

The XFX Pro Series 550W Full Wired PSU is an 80 Plus Bronze certified PSU that combines great performance, innovative design, and the high quality required by hardcore gamers and DIY enthusiasts. Advanced EasyRail technology allows you to run power-hungry components, such as a CPU and GPU, without worrying about individual rail limits. Enjoy first-class reliability and stability with 105C Japanese capacitors.

- EasyRail Plus Technology allowing plenty of wattage headroom to handle your devices
- Ultra Quiet Fan Design
- Ultra Voltage Regulation Design
- Haswell Ready
- AMD Radeon CrossFire Ready
- NVIDIA GeForce SLI Ready
- Multiple PCI-E 6-Pin and 6+2Pin connectors
- True Wattage guarantee
- 80 Plus Bronze certifying 85% power efficiency
- Extreme heat tested capacitors

GENERAL

+12V Rail Outputs : Single
100% Tested and Verified : Y
ATX12V 2.2 & ESP12V 2.91 Compliant : Y
ATX12V 2.31 Compliant : Y
Compatible with intel ad AMD platforms : Y
UPC Number : 778 656 063 051

TECHNOLOGIES

CrossFire Ready : Y
Hasewell Ready : Y
SLI Ready : Y

RATINGS & EFFICIENCIES

AC Input Current (Arms) : 4A-8A
AC Input Frequency (Hz) : 50/60 Hz
AC Input Voltage (Vac) : 100-240 VAC
Efficiency @ Typical Load : Up to 85%
Energy-Efficiency : 80 Plus Bronze Certified
Maximum Wattage : 550 Watts

OTHER FEATURES

High Reliable 105°C Japanese Capacitors : Y
