

2-in1 combination device IDEAL ACC 55

The combination device guarantees a healthy room climate throughout the year and does not only ensure clean air by filtering the smallest particles from the air but also provides ideal air humidity (evaporator system) at the same time. The system combines a humidifier and an air cleaner in one device. With an evaporation and cleaning performance suitable for rooms up to 55 m². A permanent prefilter stops hair, house dust and other major particles of dirt. The downstream HEPA fine particulate air filter filters almost all particles, pollen, bacteria and viruses. The activated carbon filter absorbs bad odours.

viruses & bacteria

pollen

animal hair

chemical fumes

dust

smell & odours

tobacco smoke

mold

aerosols

fine dust

building chemistry

exhaust fumes

Recommended for allergy sufferers

2-in-1 combination device: Air cleaner & humidifier

HEPA & activated carbon filter

Quiet operation

Low energy consumption

Optional mit Ionic Silver Stick® (anti-bakteriell)

Optionally available: antimicrobial Ionic Silver Stick®

For room sizes of up to 55 m²

And not least, the evaporation pad is in charge of air humidification. The evaporator cassette covered with an anti-microbial layer for self-regulating hygienic cold vaporisation prevents microbial growth. This prevents the growth of germs or mould in both the filter and the evaporator cassette. Energy-efficient and extremely smooth-running motor. Super-silent operation - ideal for use in sleeping rooms and children's rooms. Perfume capsule for use with essential oils. Simple cleaning by removing the water tank. Optional mit Ionic Silver Stick® für keimfreie Wasserqualität. Recommended as accessories: Due to the anti-bacterial effect of silver, the optional available Ionic Silver Stick® ensures germ-free water quality within the device.

Selectable device performance

The combination device runs on three performance levels for power operation, normal operation and quiet night operation.

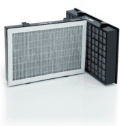

Flavoured indoor air

The perfume capsule allows to optionally flavour the air with essential oils. This creates additional wellness.

Convenient water supply

Transparent and removable water tanks with 8 litres of capacity. Ensure a long duration.

Almost 100% cleanliness

Two highly effective HEPA fine particulate air filters with a separation performance of 99.97% filter dusts and other allergens of sizes > 0.3 µm from the air (H13). Suitable for allergy sufferers.

Effective odour absorption

The activated carbon odour filter reliably removes odours and chemical compounds over a long time.

Ideal water quality

Due to the anti-bacterial effect of silver, the Ionic Silver Stick® ensures germ-free water quality within the device. Recommended as optional accessories.
