

## Options

### Rack mounting kit

Rack rails, screws and metallic plates for easy installation of the UPS to a standard 19' rack.

### Network interface card

Enables real-time monitoring of your UPS system via a standard web browser.

ABB's monitoring devices provide real-time visibility of the condition of your power equipment and help in solving problems before they become critical.

#### Models

- CS121 & CS141 slot / box Basic
- CS121 slot / box Advanced
- CS121 slot / box ModBus
- Winpower SNMP

### Sensors

Temperature sensors, humidity sensors and alarm buzzers support monitoring the environmental condition and enables an efficient identification of the alarms.

### Relay interface card

Provides contact closures for remote monitoring of alarm conditions of PowerValue 11 RT systems.

The card is user-installable, hot-swappable and enables advanced communication between the UPS and the computer

#### Models

- AS400

### Maintenance bypass PDU 16 A (for PowerValue 11 RT 1-3 kVA only)

It provides maintenance bypass capability plus serves as an output Power Distribution Unit; it allows service continuity during UPS maintenance or upgrade with no load interruptions.
