SC 8220

1+1 Pocket Value & Multi Currency Counter

Make Cash Handling Easy and Secure

Latest Note Technology at a Competitive Price

Reduce the manual cash handling and get full control of your cash.
Introducing the SC 8220, a high quality value and multi currency counter that delivers outstanding results at low cost.

Full Flexibility for the Distributor with Minimal Effort

The SC 8220 comes with a preset of around 20 currencies. One set of currencies will be available for each main geographic region containing main international currencies and regional currencies.
The distributor has the flexibility to reduce the number of available currencies to each client depending on the local sales organization.
Update of notes will be available by a simple SD Card insertion.

Full Flexibility for the End User in an Enriched User Interface

Count and verify one currency with ease and accuracy as expected with SCAN COIN note units, but when it comes to handling multi-currency the new SC 8220 also proposes two new modes to avoid time consuming and repetitive manipulations:
Multi : The machine accepts different currencies in one single operation and provides a total note count split into the various currencies found within the note bundle.
Auto : The machine identifies the currency of the first note in the bundle and sets itself in the mode to count this currency and to reject all other currencies. As soon as the pockets are empty, the machine turns back to the auto mode for the next notes acceptance. In this mode mixed notes of many different currencies are counted without any keyboard operation.
The user can also reduce the number of currencies available through the currency button in order to have only the most current one set by one finger click, while quickly accessing the full list to activate unusual ones.

Integration and Backward Compatibility

For easy back office integration SC 8220 is provided with its own protocol. All transactions can be seen and managed using the free software. SC 8220 is also provided with a partial integration of the protocol from SC 8200 to simplify the transition from SC 8200 to the new smarter SC 8220.

Front Access Features

The SD card slot is placed on the front of the machine, thus making the update of the machine very simple.
If an SD card is kept in the machine, the SD card will contain the list of all notes counted or rejected, including serial numbers of the notes read.

UV LED Bar

A new patented UV LED bar placed under the machine will help manual authentication of bad notes. The UV lights will turn on automatically for a few seconds when the notes are rejected.

Stay connected and keep control of the cash flow. The system is compatible with Windows.

Thanks to its competitiveness and strong capacity, the SC 8220 is the perfect solution for smaller retailers to larger grocery stores, hotels, gambling halls, amusement parks, gas stations, chemist's shops, cinemas, banks and public transport companies.

Technical Specification SC 8220

Width	275 mm / 10.83"	Note size	width 50–85 mm (1.97–3.35")
Depth	260 mm / 10.24"		length 100–182 mm (3.94–7.17")
Height	319 mm / 12.56"	Note thickness	0.075-0.150 mm
Weight	approx. 9.3 kg / 20.5 lb	Material	paper and polymer
Voltage	100-240 V / 60/50 Hz	Language	max seven languages including English
Power consumption	max 50W	Sensors	Dual CIS / UV / MG / IR
Speed	800 notes/min. for serial number	Display	3.2" color touch screen LCD
	900 notes/min. for value counting	Interface	USB, SD Card, LAN, serial port for printer and
	1,100 notes/min. for free counting		external display port
Hopper capacity	max 500 notes	Carton dimension LxWxH	380 mm/15.0 " x 365/14.4" x 440/17.3"
Stacker pocket	max 220 notes	Gross weight	approx. 11.40 kg
Reject pocket	max 50 notes		

Main Advantages

➡ Value Counting
Count total value of mixed denominations.

5€ + 10€ + 20€

➡ Free Count Mode
Count number of notes and not the value with optional check of features.

3 pcs.

➡ Single Denomination Counting
The first detected denomination will be counted, the other denominations will be rejected.

➡ Emission Counting
When a new note is introduced on the market, SC 8220 can separate the new from the old one.

New   Old

➡ Automatic Data
Get accurate data on the transactions through the PC Suite Software that comes with the counter. In addition, all counted notes can be logged in a text file on the SD card if present.

➡ Detect Counterfeits
Be sure to detect known counterfeits on the market. SC 8220 is based on ECB's requirements of authentication devices.

➡ Easy Flex Between Different Currencies
With a single key press you can switch between up to 20 currencies and/or limit to the main one for daily use.

€ / £ / $

➡ Auto Currency Recognition
Let the SC 8220 detect the currency with the first note of the bundle and it will work for this one during the batch and return to auto mode for the next one.

$ £

➡ Multi currency mode
The SC 8220 can count all your currencies in the bundle and can print all the totals on one ticket.

5€ + 10£ + 20$

➡ Serial Number Reading
The requirement for detecting and registering serial numbers is increasing. The SC 8220 is ready. As an SD card can receive all serial numbers and the protocols can push them to your host.

CE 0001D

➡ Well Proven Technology
High quality sensors for Ultraviolet (UV), Magnetic (MG) and Infrared (IR) reading as well as image detection with double CIS.

➡ External UV Lamps
If the quality of some banknotes is extremely poor a UV LED is turned on below the SC 8220 to let you manually check the banknotes.

➡ Easy to Update
Easy to up-date with new notes on the market. Just plug in an SD card in the value counter and you will get the latest information installed on the machine.
