SureColor SC-F6200 (nK)

Complete dye-sublimation package for creating high-quality textiles and promotional goods

The SureColor SC-F6200 is a professional digital dye sublimation roll-to-roll printer developed specifically for the production of high-quality printed textiles and promotional goods. Part of a complete Epson package, everything is made and supported by one manufacturer to ensure it all works seamlessly together.

Quality and reliability
Epson PrecisionCore TFP printheads ensure high throughput and long production life, while variable sized ink droplets enhance high-quality results. Working in tandem with the printheads, Epson's UltraChrome DS ink-set with standard black ink helps achieve the best possible results, especially on rigid substrates.

Complete package
In order to deliver superior-quality results and ensure everything works together, the SC-F6200 offers users a complete Epson package with hardware, software, printhead, ink and sublimation paper all made and supported by Epson. The printer is even supplied with Wasatch software, meaning users are ready to start printing straight away, without the need for further investment.

Low TCO and added peace of mind
High-capacity inks and a low power consumption help to keep costs down. For added peace of mind, the printer is supplied with a one year warranty as standard and users can take advantage of Epson's Print & Save managed print service programme to tightly control budget and stock[1].
