

AcuLaser C9300DTN

This top-of-the-range A3 colour laser printer offers one of the highest print qualities in its class and a low TCO.

The C9300DTN printer will appeal to businesses and medium-to-large workgroups who want first class, professional-quality prints at up to A3 size in colour. It is networked, offers double-sided printing and comes with an additional paper tray as standard.

New technology - It offers Epson's new Advanced Amplitude Modulation (AAM) screen technology to analyse dot placement and produce sharp images with well-defined edges.

High quality output - Epson's resolution improvement technology, AcuLaser Colour-RITech, eliminates uneven edges in text and delivers charts, graphics and even CAD schematics with clear, crisp tones.

Low TCO - It boasts Epson's lowest cost-per-page for a laser in both mono and colour. This, in addition to its duplex capability which helps save up to 50% on paper usage, plus the ENERGY STAR-qualified reduced power consumption, mean that its TCO is very low.

Engineered for business - It has a compact footprint and the ability to print at up to A3 size in colour. Its print speed of up to 30ppm in A4 mono and colour helps boost productivity and a paper capacity of up to 2055 sheets saves on time refilling it. And the Gigabit Ethernet and PDL support with IPSec, IPv6 and SSL makes integration into complex IT environments hassle-free. It also offers automatic double-sided printing and an additional paper tray as standard.

High durability - It has a duty cycle of up to 100,000 pages, so businesses can be confident that their investment in the Epson range is a sound one.
