

Valberg FRS-30 EL Fire Resistant Safe, Digital & Key Lock

The Valberg FRS-30 EL - fireproof safe for storing securities and documents. Ensures the safety of contents for at least an hour in case of fire. Protective qualities are confirmed by laboratory tests, certificates of compliance with Russian standards of fire resistance - class 60B. The door and the body of the safe have a multi-layer construction: double steel walls, the space between which is filled with refractory concrete. The design uses a thermal lock, reinforced with a fire-resistant sealant around the door perimeter. It is locked with two locks: key and code electronic. A passive bolt on the hinge side provides additional burglar resistance.

Features:

- Designed to protect valuables against fire. These safes have a modern design; they are convenient and reliable in operation
- Fire resistance LFS 60P according to EN 15659; 90min according to GOST R 50862-2005
- The safe body and door are manufactured with two inter-welded walls that are filled with fire resistant concrete
- Four solid metal locking bolts secure the door on all four sides
- Anchoring to the floor is available
